

## Supplementary File :

Approved drug molecule-protein network. Ellipse and round rectangles correspond to drugs and protein structures, respectively. When the pdf page are enlarged, the ligand ID of drug molecule and the PDB ID of the protein can be viewed clearly. Simultaneously, those structures associated with drugs and the relationships between drug molecules and proteins are displayed distinctly. In addition, we also provide file in cys format in supplemental materials, opening the cys file needs installing Cytoscape software, which can be downloaded here <http://www.cytoscape.org/download.php>.
